## Revising: Study tips

**Start early:** Create revision resources as soon as you finish a topic. It saves time in the lead up to exams and allows you to identify areas of difficulty.

**Understanding the content:** Take time to understand the information in your notes. Read over the content before you create a revision aid or attempt a past paper question.

**Method:** Find what works for you. Have a look at the different revision strategies in this booklet and try as many as you can.

**Take breaks:** Study for a set period of time and then take a break to prevent burnout.

**Condense:** Summarise key information as much as possible as it is easier to understand and revise in the lead up to exams.

**Get creative:** Add colour, diagrams and highlight key phrases to help you to remember important points.

**Motive:** What is your reason to study? Think about your future goals and update your personal learning profile on page 6 of this booklet to help you.
